Work Experience

iiko

Sep 2025 - Aug 2026

Junior Backend Developer

- Developed and maintained backend SaaS systems for online ordering and payment processing.
- Implemented REST APIs and business logic in Python, including a public guest ordering flow.
- Worked with PostgreSQL, SQL, Docker, Git, and integrations between cloud services and on-premises iiko systems.
- Implemented payment flows and payment callback handling; contributed to API contract design and input validation.
- Contributed to the C#/.NET integration layer and team development workflows, including Git branches, pull requests, and code review.

Education

Immanuel Kant Baltic Federal University
